

354ILC_HEILBR / Alma TL 2 Delivery

Georg Heiming

Nov 11 2021

I am pleased to say that the Alma 354ILC_HEILBR institutions data was successfully migrated and loaded to the production environment and you could start testing the data now. Please don't modify the data until initial data tests have been finished. For data testing you can of course modify single records.

Please submit any issues/questions you have via support incident using the Ex Libris Support Portal: <https://support.exlibrisgroup.com> rather than Basecamp. This should now be used only for project issues or discussions that you may contact us with.

Please note!

Primo VE is not ready yet. It will be released later on, latest on Friday, 19 November.

ILS = Aleph

Please use the following URL to enter the Production environment:

Alma domain:

<https://heilbr.alma.exlibrisgroup.com>

The 'admin' user and staff users from TL1 should still work.

Attached, please find the files:

1. Migration test load report

- Migration statistics
- Data rejects/reasons

(please check the migration test load report)

2. ID Mappings

(ID mappings are needed if there are any home made systems where the old Aleph IDs needs to be replaced by the new Alma IDs)

Alma Instance: EU04

Please note:

Acquisitions

Same as in TL1, no ACQ migrated

Inventory

Same as in TL1, many items are in UNASSIGNED location (Bókasafn= UNASSIGNED). Lots of items are in these locations especially for Heilbrigðisvísindabókasafn

If you have any questions, please let me know.

Regards,

Georg
