

354ILC_LBS / Alma TL 2 Delivery

Georg Heiming

Nov 11 2021

I am pleased to say that the Alma 354ILC_LBS institutions data was successfully migrated and loaded to the production environment and you could start testing the data now. Please don't modify the data until initial data tests have been finished. For data testing you can of course modify single records.

Please submit any issues/questions you have via support incident using the Ex Libris Support Portal: <https://support.exlibrisgroup.com> rather than Basecamp. This should now be used only for project issues or discussions that you may contact us with.

Please note!

Primo VE is not ready yet. It will be released later on, latest on Friday, 19 November.

ILS = Aleph

Please use the following URL to enter the Production environment:

Alma domain:

<https://lbs.alma.exlibrisgroup.com>

The 'admin' user and staff users from TL1 should still work.

Attached, please find the files:

1. Migration test load report

- Migration statistics
- Data rejects/reasons

(please check the migration test load report)

2. ID Mappings

(ID mappings are needed if there are any home made systems where the old Aleph IDs needs to be replaced by the new Alma IDs)

Alma Instance: EU04

Please note:

Libraries

- Additional libraries were created in TL1. Out of them, only ALM can be deleted in TL2. Other libraries ITK, NATHL, SMA still have inventory.
- New additional libraries SAHHL, SKK with inventory.

Inventory

- P2E resulted in 7941 e-titles/8481 portfolios, out of them 1194 not available

Acquisitions

Same as in TL1:

- Vendors do not have an email in their accounts.
- Vendor with EDI information needs additional information.

If you have any questions, please let me know.

Regards,

Georg
